---

SUMMARY

Full Stack Developer with experience building and integrating frontend and backend systems for web and mobile applications. Strong background in React, Next.js, JavaScript, and React Native, with hands-on experience in RESTful API integration, backend service development, and application workflows. Comfortable working across the stack—UI, APIs, and data flow—while focusing on scalable architecture, clean code, and secure, maintainable systems.

PROFESSIONAL EXPERIENCE

Team Lead | Turing

June 2025 – July 2026

- Led and managed a team of developers, overseeing task allocation, code reviews, debugging, and project delivery.
- Conducted **AI model benchmarking and evaluation**, assessing model outputs for accuracy, reliability, and performance across diverse tasks.
- Developed and executed **code testing and quality assurance workflows**, identifying bugs, edge cases, and performance issues to improve software quality.

Software Developer | Turing

Mar 2024 – June 2025

- Contributed to frontend and backend-integrated features, working with APIs and application data flows.
- Participated in code reviews, testing, and debugging to ensure production-ready stability.
- Collaborated in distributed agile teams using CI/CD pipelines and modern development practices.

Frontend / Full Stack Developer | Helpert

Sep 2023 – Mar 2024

- Built end-to-end features by integrating React Native and web frontends with backend REST APIs.
- Worked with backend services to handle data flow, API responses, and application state.
- Implemented responsive, reusable UI components while ensuring smooth backend communication.
- Collaborated closely with designers and backend engineers on full-stack feature delivery.

Frontend Web Developer | Bask Health

Jun 2022 – Jan 2023

- Developed web applications backed by APIs for healthcare workflows involving hospitals, doctors, and patients.
- Integrated frontend components with backend systems to support real-world data interactions.
- Assisted in refining application logic, usability, and end-to-end user flows.

EDUCATION

- **Ujjain Engineering College, Ujjain**
  Bachelor of Technology (B.Tech)
  2025
- **The Aditya Birla Public School**
  12th (96%)
  2020

TECHNICAL SKILLS

Frontend

- React.js, Next.js
- React Native, Expo
- JavaScript (ES6+), TypeScript
- HTML, CSS, TailwindCSS, Material UI

Backend & APIs

- Node.js (RESTful API integration and backend workflows)

- Python (application development, scripting, backend utilities)
- RESTful Web API development & consumption
- Authentication & authorization flows (token-based concepts)

Databases & Data Handling

- API-driven data modeling
- Basic database interaction and query handling
- Understanding of schema design and data flow optimization

Tools & Practices

- Git & version control
- Agile / Scrum workflows
- Debugging, troubleshooting, and performance optimization

ADDITIONAL PROFESSIONAL SKILLS

Other Programming & Development Experience

- Python (Application development, scripting, automation)
- C# (Used with Unity for game development)
- Blockchain fundamentals (Smart contracts concepts, decentralized systems, Web3 basics)
- Unity Game Development (2D/3D fundamentals, gameplay logic, component-based architecture)

Collaboration & Engineering Practices

- Agile / Scrum workflows
- Cross-functional collaboration with design and backend teams
- Code reviews and peer feedback
- Version control–driven team workflows (Git)

Professional & Soft Skills

- Technical leadership and ownership of features
- Team coordination and task breakdown
- Clear technical communication with non-technical stakeholders
- Problem-solving under ambiguity
- Time management and delivery-focused execution

CERTIFICATIONS

- Foundational C# – Microsoft | freeCodeCamp (Feb 2024)

- Software Engineering Job Simulation – Electronic Arts | Forage (Nov 2023)
- CS50: Ready Player 50 (Oct 2023)
- Level Up: JavaScript | LinkedIn (Sep 2023)
- Triplebyte Certified (Jan 2023)
- Front End Development Libraries | freeCodeCamp (Jun 2021)
- JavaScript Algorithms & Data Structures | freeCodeCamp (Feb 2019)
